

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

Massage therapists
Whether you work full-time or occasionally consult at a spa, you can manage all of your appointments from a single scheduler.

Dentists
Walk-ins, like plaque, are unavoidable. Help your front desk manager work out your availability by quickly looking

Psychiatrists
Have an office of your own where you meet patients? Set up working hours and business details.

Chiropractors
One treatment doesn't work for all patients. A visit could be a simple, routine adjustment or a full session involving traction and muscle stimulationChiropractors
One treatment doesn't work for all patients. A visit could be a simple, routine adjustment or a full session involving traction and muscle stimulation

Managing a clinic with visiting physicians, on-call doctors, or ENT specialists? Invite them all to add their schedules and services. You can manage all appointments from a single place.

Very useful to peoples

Medical lines will support the peoples

care about making the lives of their patients better

Preparation and manitanence of ZOHO Books HealthHub medical clinic

The act of looking at something changes it – an effect that holds true for people, animals, even atoms. Here's how the observer effect distorts our world and how we can get a more accurate picture.

This field is very sensitive

In physics, Erwin Schrödinger's famous cat highlights the power of observation. In his best-known thought experiment

It's the best feeling to see someone's life improved by a product we designed.

manage insurance

Feeling Medicine is an account of both the evolution of the pelvic exam teaching in medical school,

generate statements for patients

feeling for veins ahead of a blood draw is similar to the experience of "feeling" during a pelvic exam.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
